ARCHITECTURE

Designed by the renowned **architectural bureau AB5** and led by the talented architect **Lasha Losaberidze**, this development elegantly combines functionality with beautiful design. The complex consists of two 12-story blocks, connected by a spacious two-level underground parking garage. On the ground floor, convenient commercial spaces will be available, while the 11th floor will host a blend of residential apartments and office spaces. Designed to accommodate 250 families, this project promises to be a modern urban oasis.

The building will offer two separate entrances for residents, each with a pair of high-quality European elevators, ensuring smooth and efficient access to all floors.

For the exterior, every detail has been meticulously planned. The building's façade will feature sleek LAMINAM-facing stone and sophisticated natural basalt, offering a clean, modern aesthetic that harmonizes beautifully with the surrounding landscape

CITY MALL

A key highlight of **Roomix Vazha-Pshavela** is its proximity to **CITY MALL**, a major shopping hub just 100 meters away from your future home.

Whether you need to stock up on groceries, pick up a prescription, catch the latest movie, or enjoy a workout, this vibrant shopping center has everything you need to simplify your daily life.
